**Stereoselective synthesis of medium-sized and macrocyclic, naturally occurring lactones**

**Prof. J. Alberto Marco Ventura**

Universitat de València

**Friday 8th October, 2010. ICIQ Auditorium, 12 p.m.**

Prof. J. Alberto Marco obtained his PhD in 1977 at the Universitat de València. He spent a Postdoctoral period as a Von Humboldt fellow at the Institut für Organische Chemie (Universität Köln, Germany) under the guidance of Prof. Emanuel Vogel. In 1992, Prof. Marco obtained a Full Professor position at the Universitat de València where he leads a research group whose main investigation interest is the asymmetric synthesis of natural products with cytotoxic and antibiotic activity.

Prof. Marco is author of about 185 publications and has been director of 14 Doctoral Theses. The research of Prof. Marco focuses on the stereoselective synthesis of natural products, organic synthesis and total synthesis of macrolid antibiotics.
