

*Quantum chemistry for molecules  
with 1000 and more atoms*

**Dr. Christian Ochsenfeld**

**University of Munich (LMU), Germany**

**Friday 16th July, 2010. ICIQ Auditorium, 12 p.m.**

Christian Ochsenfeld studied chemistry at the University of Karlsruhe and obtained his PhD in the group of Reinhart Ahlrichs. After three years of postdoctoral research at UC Berkeley, he continued his research at the University of Mainz funded by Liebig and Emmy Nother grants. In 2001 he obtained two professor positions at the Universities of Tübingen and Essen. From 2002 to 2010 he was professor for Theoretical Chemistry at the University of Tübingen.

In 2009 he obtained five professor/chair positions at the Universities of Vienna, Berlin, Munich, Uppsala and Konstanz. Since February 2010 he holds the chair for Theoretical Chemistry at the University of Munich. His research interests focus on the development and application of quantum-chemical methods for the calculation of large molecular systems.
